

## Staff voice

- Children are enthusiastic about their learning.
- Children are exploring new things and experimenting with new ideas.
- Children are curious and make connections
- It is practical and engaging
- Lessons promote science for everybody, anybody can be a scientist!
- Children ask questions and think about how they can problem solve.
- It is spontaneous
- Children can retrieve information previously learnt and apply it to new learning.

## Science is good at our school when...

## Our vision

We want to bring science to life and prepare children for the future, by developing their curiosity, inquisitiveness, and scientific skill set, which promotes a lifelong love of learning.

## Pupil voice

- We do practical experiments to find out answers to questions.
- We learn about scientists and jobs that match our topic
- We use equipment
- We go on science trips
- It is fun and we can go outside
- We can work in groups to talk about our ideas
- We learn about things that interest us.
